Claim 8, line 9, after "by employing" please delete "said".

The following is an examiner's statement of reasons for allowance: As per claims 1 and 5, the prior art of record fail to teach an array of destination and source address segments that are generated, according to their respective address sequential orders; an array of destination and source port segments are generated between their respective ports, based on the address segments; wherein a source-destination port mapping table comprising multiple entries from the generated arrays, is formed.

Independent claims 6 and 8 provide a method for processing a table that includes a plurality of table entries with each entry providing data for defining a plurality of multiple-dimensional spaces. The method includes steps of A) assigning an ordered sequence number as a table entry counter ip to each of the table entries. B)

Fragmenting the multiple-dimensional spaces into order spatial ranges and assigned each of the spatial ranges with a sequential spatial range-numbers. C) Forming multiple-dimensional range-spaces by employing the sequential spatial range-numbers as coordinates and assigning an associated table entry counter ip to each block defined by the spatial range-number coordinates for providing an index for correlating each of the sequential spatial range-numbers to the each of the table entry
